Subject: bison

Paul & Jo Webb are strongly against relocating any bison on Spotted Dog or any other location. I had buffalo as a kid and they get thru fencing, are very destructive of land and carry disease. It is not fair to locate these animals on land that is adjacent to privately owned land. Keep them in the park!

The wolves are a very good case study to show that the government can not manage anything and should not place lobbyist adendas over land owners that pay taxes. Quit trying to manage wildlife. Just let God do it! If you have too many then place a hunt on them. As land owners we are tired of feeding your elk, wolves, ANTELOPE that you planted here. If you add buffalo you are sending a message that you are trying to bankrupt Montana's ranchers! Don't do it.
